Recommended Secondary Containment Devices

The Department of Biological Safety has compiled a list of recommended devices for secondary containment when transporting biological agents outside of the laboratory. Please click on the pictures below for more information. Feel free to contact one of our specialists for further consultation on appropriate containment for transporting biological agents at 859-257-1073, 859-323-5728 or by email at ehsbiosafety@uky.edu.
