Collect sharps in a puncture-resistant, leak-proof sharps container labeled with the universal biohazard symbol. When the container is ¾ full, arrange for pickup via E-trax (Environmental Management). In Med Science, HSRB, Combs, Whitney Hendrickson, Roach & Gill Heart buildings, housekeeping staff will collect.

If animals are originally obtained from the Department of Laboratory Animal Resources (DLAR), collect waste in a leak-proof opaque bag and return to the appropriate location in DLAR. Use a red bag for intentionally infected animals. Place red bags in designated area in DLAR. Otherwise, arrange for pickup via E-trax (Environmental Management).

Collect waste in a cardboard box labeled with "broken glass". Securely tape the box closed when full and housekeeping staff will collect.
